

Dear Friends,

Welcome to the Holistic Child Health Newsletter.

The goal of my holistic pediatric practice, and of this newsletter, is to inform and support parents to become more empowered as the primary health care providers for their children.

Extending far beyond Western medicine's conventional treatments, holistic medicine and mindful parenting allow us to boost children's natural immunity, support their optimum health and wellness, safely heal any illnesses, and prevent disease-without dangerous side effects. Holistic medicine provides us with the tools to nurture the physical, emotional, social and spiritual health of your children.

Over the coming months and years, I intend to use this newsletter to address some of your concerns as parents, share information that you might want to add to your knowledge base, and inform you of important issues and current events that are happening in the news, and in your area.

Together we can heal the whole child. Naturally.

Yours in Health,

Lawrence B. Palevsky, MD

ACTION ALERT

New York Take Action:

Assemblymember DiPietro Introduces Bill Restoring Religious Exemption

New York Assemblymember David DiPietro (R-East Aurora) has introduced a bill that would restore the religious exemption from vaccine mandates to attend school in New York.

Assembly bill A8676 simply restores the language in New York Public Health Law Section 2164 that was repealed last June 13. If passed the bill would restore the legal basis for 26,000 children to return to school. Read the bill here:

<https://nyassembly.gov/leg/?bn=A08676&term=2019>

Please click the link below and then on the Take Action link which should appear in the upper right of this message to send an email to your Assemblymember asking him or her to sign on to DiPietro's bill as a co-sponsor or multi-sponsor.

http://capwiz.com/a-champ/issues/alert/?alertid=80706626&queueid=%5Bcapwiz:queue_id

Please give Asm. DiPietro's office a call and thank him for his refusal to submit to a gross injustice. (716) 655-095

Please call your Assemblymember and ask him or her politely to sign on to DiPietro's bill as a co-sponsor or multi-sponsor. Your Assemblymember for the address on file for you in our database should appear below.

DiPietro is a Republican, which is in the minority party in the Assembly. Bills from minority parties rarely become law, but it does happen. Moreover, Di Pietro's simple statement calling for the legislature to make amends for this horrible stain on both them and the State of New York, and end this travesty, is bold, necessary and worthy of our support. This bill bears witness to the gross injustice committed by Governor Cuomo and the majority in the legislature.

DiPietro's justification contained in the Memo prepared to explain the bill is brief, direct and eloquent.

“The elimination of religious exemptions in regard to vaccinations is unconstitutional. Eliminating religious exemptions goes directly against the separation of Church and State. It is important that we uphold the religious freedoms for the citizens of this state.”

Please share this message with friends and family, and please post on social media while we still can.

GARDASIL ALERT

NEW YORK TAKE ACTION!! URGENT!

GARDASIL WITHOUT YOUR CONSENT IS COMING!

Shortened legislative session begins in only 12 weeks.

The next session of the New York legislature begins in only 12 weeks, and they are ending the session a month early so they can campaign for re-election, which means there is even less time to try and stop the many bad bills we know are coming, including mandatory flu shots, mandatory Gardasil, and shots for STDs without parental knowledge or consent.

The most threatening bills are S3899a (Krueger, D-Upper Eastside), and A973a (Paulin, D-Scarsdale) which would allow minors to get vaccines for hepatitis b at any age, and Gardasil (human papilloma virus) at age nine without parental knowledge or consent. Even if your children are homeschooled this bill means that anytime your children are out-of-sight they

could legally be injected, and you would never know. Not only that, this bill begins with shots for STDs but we know from California and other states that the vaccine industry's goal is to expand it to cover all vaccines. This is just part of a greater effort to take away your ability to decide what is injected into your child's body.

This bill is a national priority of the vaccine industry, and versions of it have been introduced in state legislatures across the US. Senator Krueger's bill S3899a was already passed by the Senate Health Committee on a straight party line vote (10 Democrats in favor, 5 Republicans opposed.) Those who voted for the bill are Senators Benjamin Bailey, Alessandra Biaggi, Julia Salazar, Chair Gustavo Rivera, Toby Ann Stavisky, Todd Kaminsky, Velmanette Montgomery, Jen Metzger, Brad Hoylman, and David Carlucci. Senators who voted against are Robert Antonacci, Patrick Gallivan, Patty Ritchie, Chris Jacobs and Betty Little.

Please click on the link below and then click the Take Action link on that page to send messages to the Governor, your State Senator and your Assemblymember and the Governor stating your opposition to the bills.

<http://bit.ly/2JAgY5U>

Gardasil has a terrible safety record. Gardasil has an alarming safety record. According to the federal Vaccine Adverse Event Reporting System as of 7/14/2019 there have been 62687 reported adverse incidents with HPV vaccines, including 510 deaths, 15,413 emergency room visits, 6,309 hospitalizations, and 3031 permanent disabilities. And according to Dr. David Kessler, who was the head of the FDA under Presidents George H. W. Bush and Bill Clinton, these injuries are probably less than 10% of the actual number. The safety record for HPV vaccines is so troubling that Japan ended their recommendation of HPV vaccination for Japanese girls in 2014.

Children do not know enough about their own medical history to consent. It is absurd to assume that a child of any age knows enough about their own medical history and the medical history of their family to provide informed consent. They must know if they had earlier adverse reactions to vaccines given to them as infants, whether they have allergies or sensitivities to vaccine

ingredients, or if there is a family medical history that would contra-indicate a shot. A nine-year old, or younger, child will know this?

Merck is charged with submitting fraudulent documents in the licensing process. A lawsuit is under way in California, *Robi v. Merck*, that alleges Merck, the manufacturer of Gardasil, submitted fraudulent safety and efficacy data to the federal government during the licensing process.

The bill protects pedophiles. This bill also provides protection to pedophiles by subverting New York's "Mandated Reporter" law that requires licensed professionals to report suspected sexual abuse of children. What rational person would not suspect something was very wrong if a nine-year old requested an injection that purports to prevent a sexually-transmitted disease and he or she did not want their parents to know about it?

Who decides who can decide. A person giving the shot, who may have a financial incentive to do so, is allowed to use whatever reasons they want to determine if a minor is capable of giving consent. Nor is there any language to prevent shots from being given to minors with intellectual or developmental disabilities.

How can a parent make informed healthcare choices for their child? In the event of an adverse reaction, especially if a child is unconscious, how is a parent, first responder, or other healthcare professionals supposed to provide appropriate medical care to the child?

Nothing prevents children from consenting to experimental vaccines, There is nothing in the law that prevents children from "consenting" to experimental vaccines.

STDs are not transmissible in school, As a sexually-transmitted disease there is no chance that HPV can be transmitted via casual contact at school, or anywhere else.

Efficacy of Gardasil is in doubt, We also do not have solid evidence that vaccines actually prevent cervical cancer, which takes decades to develop and we have no solid data on how long the vaccine is allegedly effective.

TAKE ACTION

US TAKE ACTION!

FEDERAL BILL SEEKS NATIONAL DATABASE OF ALL VAX RECORDS... NO OPT OUT!

Pays for propaganda campaign and free market research for the Vax industry

The US House of Representatives is at it again, Representative Kim Schrier, MD, (D-WA-8) authored the Vaccines Act of 2019, H.R. 2862, which is described as a bill, “to provide for a national system for surveillance of vaccine rates, to authorize research on vaccine hesitancy, to increase public understanding of the benefits of immunizations, and for other purposes.” It also includes a propaganda campaign to promote vaccines. An initial \$75 million would be allocated from 2020 to 2024.

Please click on the Take Action Link on the page after clicking below to send a message to your member of the US House of Representatives opposing H.R. Vaccines Act of 2019.

The bill for the first time would, “develop and deploy a national system for surveillance of vaccination rates” for the purposes of understanding, “vaccination confidence over time; “variations across time and geography;” and ominously, “to measure vaccine refusal.”

It would allow the feds to create a federal database of the vaccine records of the American population by consolidating existing state and private databases to measure if, “(i) vaccines are or will be underutilized; (ii) vaccine confidence is low or decreasing, (iii) misinformation about the safety of vaccines, not supported by scientific or medical evidence, has been directed in a targeted manner.” No language in the bill allows individuals to exclude information about themselves or their children from the database.

In short, this is a huge subsidized marketing plan for the vaccine industry. And it includes a propaganda campaign for the vaccine industry paid for by the taxpayers. There is no companion bill yet in the US Senate, and only 23 co-sponsors have signed on so far.

All states keep track of the vaccination status of school children. Some states track adults as well. The US has extremely high vaccination rates even with our recommended schedule that has far more doses than any other country in the world. The four largest drug companies in the world, Pfizer, Merck, Glaxo and Sanofi control almost 90% of the \$59 billion global vaccine market. They do not need \$75 million from the American taxpayers to identify markets and promote their liability-free products.

And what gives the federal government the right to gather all the vaccine records of everybody in the US without our permission? Yet again we have the government and private industry working together, with no accountability, to benefit for-profit industries with our money while taking away fundamental medical privacy rights for ourselves and our children.

<http://bit.ly/34jPRE5>

THE GARDASIL TRUTH

After Gardasil was licensed and three doses recommended for 11-12 year

old girls and teenagers, there were thousands of reports of sudden collapse with unconsciousness within 24 hours, seizures, muscle pain and weakness, disabling fatigue, Guillain Barre Syndrome (GBS), facial paralysis, brain inflammation, rheumatoid arthritis, lupus, blood clots, optic neuritis, multiple sclerosis, strokes, heart and other serious health problems, including death, following receipt of Gardasil vaccine.

The Japanese government stopped giving the Gardasil vaccine in 2013 after health officials recorded nearly 2,000 adverse reactions, according to the Tokyo Times.

<https://www.tokyotimes.com/side-effects-in-young-girls-take-gardasil-out-from-japanese-market/>

There is the MIT and Stanford educated medical doctor who also has a Master's Degree in Public Health? The one who is a vaccine developer and has worked for Merck, the manufacturers of the Gardasil vaccine? Dr. Harper has repeatedly spoken out against the HPV vaccine and raised serious concerns about whether it is safe. As reported by CBS News in 2009:

ABOUT DR PALEVSKY

Dr. Palevsky is a NYS licensed pediatrician, who utilizes a holistic approach to children's wellness and illness. Dr. Palevsky received his medical degree from the NYU School of Medicine in 1987, completed a three-year pediatric residency at The Mount Sinai Hospital in NYC in 1990, and served as a pediatric fellow in the ambulatory care out-patient department at Bellevue Hospital, NYC, from 1990-1991. Since 1991, his clinical experience includes working in pediatric emergency and intensive care medicine, in-patient and out-patient pediatric medicine, neonatal intensive care medicine, newborn and delivery room medicine, and conventional, holistic and integrative pediatric private practice.

Dr. Palevsky is a diplomate of the American Board of Integrative Holistic Medicine, and Past-President of the American Holistic Medical Association. He received his pediatric board certification in 1990, and passed his pediatric board recertification exams in 1997, 2004, and 2011.

In his current practice in Northport, Long Island and Manhattan, NYC, Dr. Palevsky offers well-child examinations, consultations and educational programs to families and practitioners in the areas of preventive and holistic health; childhood development; lifestyle changes; nutrition for adults, infants and children; safe, alternative treatments for common and difficult to treat acute and chronic pediatric and adult conditions; vaccination controversies; mindful parenting; and rethinking the medical paradigm. Additionally, he teaches holistic integrative pediatric & adolescent medicine to parents, and medical and allied health professionals, both nationally & internationally, and is available for speaking engagements worldwide.
