

Dear Friends,

**Welcome to the Holistic Child Health Newsletter.**

The goal of my holistic pediatric practice, and of this newsletter, is to inform and support parents to become more empowered as the primary health care providers for their children.

Extending far beyond Western medicine's conventional treatments, holistic medicine and mindful parenting allow us to boost children's natural immunity, support their optimum health and wellness, safely heal any illnesses, and prevent disease-without dangerous side effects. Holistic medicine provides us with the tools to nurture the physical, emotional, social and spiritual health of your children.

Over the coming months and years, I intend to use this newsletter to address some of your concerns as parents, share information that you might want to add to your knowledge base, and inform you of important issues and current events that are happening in the news, and in your area.

Together we can heal the whole child. Naturally.

Yours in Health,

***Lawrence B. Palevsky, MD***

## URGENT ACTION!!!

### Calling All New Yorkers!! Oppose A8378 Covid-19 Vaccine Mandate for Children!

A8378 was introduced and referred to the Assembly Committee on Health on 10/20/2021. Although this bill has not yet been set for a hearing, the Committee could potentially act on the bill at any time. This is why it is important to reach out to your state legislators about A8378 now.

This bill would require all children between the ages of two months and eighteen years to be vaccinated with a COVID-19 vaccine if they attend a school or are in a

day care facility, and if the COVID-19 vaccine is recommended for use in their age range. Public, private, and parochial schools and child care providers are covered by this bill.

**ACTION NEEDED:**

1. Contact your New York state assemblymember and senator and ask them to strongly oppose A8378. If you do not know who your New York state legislators are, login to the NVIC Advocacy Portal at <http://NVICAdvocacy.org>. Click on “Check What is Happening in Your State” on the home page or “My State” on the STATE TEAMS tab. Your personal state legislators are listed on the right side of the page. You can click on your legislators’ names to get phone numbers, emails, and even links to their social media to connect to them. You can also find your legislators using these links: <http://assembly.state.ny.us/mem/search/> and <https://www.nysenate.gov/registration/nojs/form/start/find-my-senator> Please see talking points below.

2. Contact the members of the New York Assembly Health Committee by phone or email and ask them to strongly oppose A8378. Please see contact information and talking points below.

**TALKING POINTS** (Personalize to share how this bill affects you and your family):

STRONGLY OPPOSE A8378 which requires children to be vaccinated with the COVID-19 vaccine.

Because New York families lost the ability to request religious exemptions from vaccine mandates in 2019, this bill, if passed, would force vaccination of their child even if this goes against their religious beliefs.

The risk of children dying from COVID-19 is very low. One summary consisting of public health data from 45 states, New York City, Puerto Rico, and Guam indicated that only 0.00%-0.03% of COVID-19 cases in children resulted in death as of November 11th, 2021. CDC data shows that four different age groups of children (0-4 years, 5-11 years, 12-15 years, and 16-17 years) each account for less than 0.1% of the total percentage of COVID-19 deaths in the nation. The COVID-19 vaccine has been approved for use on all children, even though certain populations were excluded from clinical trials for the COVID-19 vaccine.

Young adults and teens (especially males) vaccinated against COVID-19 have been shown to have a higher risk for myocarditis (heart inflammation) than other populations. There has simply not been enough time to see what the risks of myocarditis and other potentially serious side effects of the vaccine are for younger children.

A briefing document for the FDA's Vaccines and Related Biological Products Advisory Committee (VRBPAC) states on page 11 that "The number of participants in the current clinical development program is too small to detect any potential risks of myocarditis associated with vaccination." The document goes on to say the long-term safety of the COVID-19 vaccine in children 5-12 years of age will be evaluated in additional studies, including a 5-year follow-up study. The FDA approved a formulaic change to the vaccine, containing an ingredient which the FDA states will make the vaccine easier to store. Some have noted that this ingredient, tromethamine, is also used to stabilize individuals after experiencing cardiac arrest.

There is no need to mandate this vaccine, because it is already available to anyone who wants it.

Children should not be exposed to the risk of the vaccine in order to protect others because It is well documented that vaccinated people still contract and spread COVID-19.

**From Dr Peter McCullough :**

**Data Show Excess Mortality All Around the World Due to Covid “Vaccines”**

Summer 2021 going into Fall 2021 is seeing a meteoric rise in all-cause mortality compared to that of the same time period in 2020. What changed? The “Operation Warp Speed” injections they are calling “vaccines” were rolled out all around the world.

Every country where jab uptake is high, including in Scotland, Israel, Denmark and the United States, is seeing a massive spike in deaths from things other than “covid.” The obvious culprit is the jabs, of course.

The Unz Review put together an extensive analysis of the available data, which clearly shows that all-cause mortality is “mooning,” so to speak. Records are being smashed in terms of death tolls, especially in areas of the world where large numbers of people took the injections.

In Scotland, for instance, the government recently logged the 20th consecutive week in which excess deaths throughout the country have exceeded the five-year average. This is in a country with an 87 percent jab compliance rate so far.

“Even excluding Covid deaths they were almost 20% above normal for the most recent week, and the trend is rising,” relayed Alex Berenson on his Substack.

Germany is in a similar quagmire with nearly 78,000 reported excess deaths, a figure 10 percent higher than what was expected.

“Mortality figures (in Germany) in September 2021: 10% above the median of previous years,” Berenson added.

More young people are dying from covid jabs than old people.

In Denmark, Finland and Norway, “mystery” covid deaths are currently higher than ever before, even during the “worst” of the pandemic. The deaths really started spiking in these three countries immediately following the “vaccine” rollout.

For five months in a row, Denmark has shattered the 10-year record of people dying from “all causes.” Meanwhile, there have been basically zero deaths caused by “covid” during this time.

Ireland, the United Kingdom and Israel are all posting similar alarming figures. And it just so happens that all three of these countries have extremely high “vaccination” rates.

Interestingly, the worst-off demographic in all this is young people, who are dying at a much higher rate from the injections than the elderly. One would think that the opposite would be true.

“While the COVID death toll has been largely confined to the elderly ... it’s the young who are bearing the brunt of vaccine injury,” reported LifeSiteNews, as relayed by Unz.

“According to VigiAccess, the adverse event database for the World Health Organization, 41% of the more than 2.4 million vaccine injuries reported so far are among those under age 44, and just six percent are among people over age 75.”

It is a genocide of the young that is taking place with these injections, in other words.

Not only deaths but also serious injuries are on the rise from these injections. Think things like heart attacks, strokes, blood clots, circulatory diseases and neurological issues, “the same vaccine-induced ailments we were warned about by the physicians and scientists who’ve been telling us the truth from the start,” noted Unz’s Mike Whitney.

“Simply put, the vaccines are increasing fatalities, not reducing them,” Whitney adds. “They are making matters worse not better.”

“They are perpetuating the crisis not ending it. And that is why the red line in the chart is pointing upward. It’s an indication that the death toll will continue to rise as long as we continue to do what we are doing now, inoculating millions of people with a cytotoxic pathogen that triggers blood clots, inflammation and autoimmunity.”
